

```
1 #exercise 1 - triple quotations for line breaks
2 print('''looking at
3 how to do multiple lines without
4 writing print multiple times''')
```

```
looking at
how to do multiple lines without
writing print multiple times
hello abbey
```

```
1 #exercise 2 - combining text, calculations, etc. with commas
2 #this example above is about how to combine text with calculations etc. in the print function
3 '''
4 can also write comments like this
5 where you can
6 write multiple lines
7 you only use the hashtags for single line comments, and
8 triple quotations for multiple lines
9 '''
10 print('The tax for a $50 is $',0.15*50,'which seems like too much')
```

```
The tax for a $50 is $ 7.5 which seems like too much
```

```
1 #exercise 3 - i'm not sure what the point of this exercise was
2 #this program display's a person's name and address
3 print("Kate Austen")
4 print('123 Full Circle Drive')
5 print('Asheville, NC 28899')
```

```
Kate Austen
123 Full Circle Drive
Asheville, NC 28899
```
